

# How to create a hypersonic sound

## Method1. Perform on a hypersonic instrument.

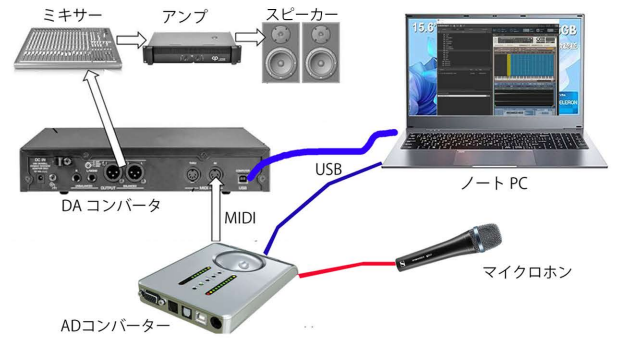

### Hypersonic Piano

It can produce piano sounds that include hypersonics.

### Hypersonic Vocal

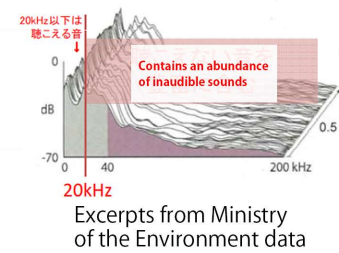

It is possible to put hypersonics on a person's voice, such as singing or reading from a microphone.

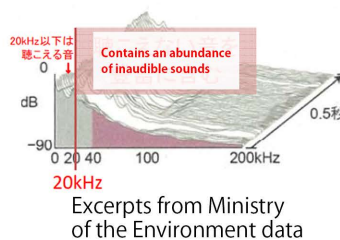

## Hyper Sonic Guitar, Hyper Sonic Bass, etc. are also under development.

- ◆ The sound of hypersonic instruments can be recorded in 192 kHz 24-bit PCM recording format. The sound hypersonic instruments contain the environmental sounds of the rainforest or a gamelan equivalent or more hypersonics.

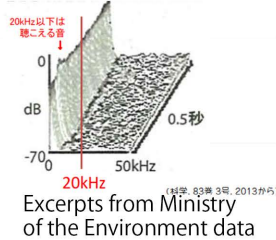

### ◆ African Rainforests

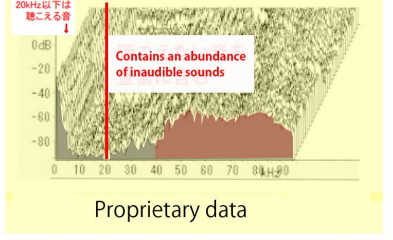

### ◆ Sound of Balinese gamelan performance

### ◆ Sound of piano performance

### ◆ Sound of Hypersonic piano performance

## Method2. Converting recorded songs into hypersonic music

- ◆ Hypersonic components can be added to pre-recorded music such as CDs and mp3s to convert them into hypersonic music. The recording format is 192 kHz 24-bit PCM. For more information, please refer to the "More Information" section at the bottom of this page. Sample data of the hyper-sonic music is also available.

**Hypersonic music created using these methods will be available for downloading and distribution. We will continue to promote the use of this technology in the following areas**

- 1) BGM for dance, yoga, meditation, etc.
- 2) BGM in hospitals, treatment centers, senior citizen facilities, etc.

## Meet the HyperSonic Artists

Jazz pianist and singer
